Addition – Övning 6

Hitta talet som saknas i en addition där summan maximalt är 20

$6 + \underline{} = 11$	$\underline{} + 6 = 14$	$6 + \underline{} = 16$	$\underline{} + 3 = 12$
$9 + \underline{} = 16$	$\underline{} + 1 = 11$	$5 + \underline{} = 9$	$\underline{} + 8 = 14$
$8 + \underline{} = 17$	$\underline{} + 9 = 13$	$2 + \underline{} = 11$	$\underline{} + 6 = 13$
$3 + \underline{} = 11$	$\underline{} + 5 = 8$	$7 + \underline{} = 14$	$\underline{} + 4 = 10$
$8 + \underline{} = 15$	$\underline{} + 5 = 15$	$7 + \underline{} = 10$	$\underline{} + 10 = 19$

$7 + \underline{} = 11$	$\underline{} + 9 = 16$	$9 + \underline{} = 18$	$\underline{} + 8 = 16$
$5 + \underline{} = 11$	$\underline{} + 4 = 12$	$8 + \underline{} = 10$	$\underline{} + 4 = 13$
$9 + \underline{} = 14$	$\underline{} + 7 = 11$	$7 + \underline{} = 15$	$\underline{} + 5 = 12$
$5 + \underline{} = 13$	$\underline{} + 9 = 12$	$8 + \underline{} = 13$	$\underline{} + 7 = 13$
$9 + \underline{} = 17$	$\underline{} + 6 = 15$	$4 + \underline{} = 14$	$\underline{} + 9 = 15$

$\underline{} + 6 = 12$	$\underline{} + 4 = 13$	$9 + \underline{} = 15$	$5 + \underline{} = 10$
$\underline{} + 6 = 10$	$\underline{} + 8 = 14$	$8 + \underline{} = 16$	$9 + \underline{} = 17$
$\underline{} + 7 = 14$	$\underline{} + 5 = 12$	$3 + \underline{} = 12$	$4 + \underline{} = 12$
$\underline{} + 3 = 11$	$\underline{} + 7 = 15$	$9 + \underline{} = 11$	$8 + \underline{} = 18$
$\underline{} + 7 = 12$	$\underline{} + 9 = 14$	$7 + \underline{} = 15$	$7 + \underline{} = 16$

$\underline{} + 5 = 13$	$5 + \underline{} = 11$	$\underline{} + 9 = 18$	$6 + \underline{} = 11$
$\underline{} + 9 = 15$	$6 + \underline{} = 10$	$\underline{} + 7 = 13$	$8 + \underline{} = 17$
$\underline{} + 7 = 11$	$5 + \underline{} = 15$	$\underline{} + 5 = 14$	$9 + \underline{} = 12$
$\underline{} + 4 = 12$	$7 + \underline{} = 13$	$\underline{} + 4 = 11$	$4 + \underline{} = 13$
$\underline{} + 7 = 16$	$5 + \underline{} = 13$	$\underline{} + 7 = 17$	$3 + \underline{} = 11$
